Re: Denison Mines (USA) Corp.  
State of Utah 11e.(2) Radioactive Material License # UT1900479  
White Mesa Mill, Blanding, Utah  
License Condition Number 9.7 – Cell 4B Archaeological Clearance

Dear Mr. Finerfrock:

In accordance with State of Utah 11e.(2) Radioactive Material License # UT1900479, License condition number 9.7, Denison Mines (USA) Corp. ("DUSA") contracted with Abajo Archaeology to conduct initial field investigations, prepare the Research Design Plan for mitigating adverse impacts on archaeological sites due to the construction of Cell 4B, and conduct field activities in accordance with the approved Research Design.

DUSA required that Abajo Archaeology conduct the field work in full compliance with the Research Design Plan approved by the State of Utah Historic Preservation Office. The Research Design used the initial field testing results to outline a data recovery plan for the historic sites in the proposed Cell 4B project area. The Research Design was submitted to the Utah Department of Environmental Quality, Division of Radiation Control ("DRC"), which in turn submitted the report to the Utah State Historic Preservation Office. Abajo Archaeology also tendered a copy for review to the Utah Public Lands Policy Coordination Office, and the Edge of the Cedars Museum, Blanding, Utah.

In addition to the Research Design and field work, DUSA has required Abajo Archaeology to prepare a final report upon completion of the field work, detailing all the work activities and the information recovered. This final report is expected to be complete by July 31, 2011, due to extended time periods required for out of house

sample analysis, and laboratory back log. DUSA has also required that all artifacts and other materials recovered with the project be under the control and care of Abajo Archaeology at all times and eventually be curated at the Edge of the Cedars State Museum in Blanding, Utah. To that end, artifacts will be packaged in appropriate archival housing at the time of cataloging.

If you have any questions on the foregoing information please feel free to contact me at (303) 389-4132.

Yours very truly,

**DENISON MINES (USA) CORP.**
